Quickstart Directions for Rust Remover

Removes rust from stainless steel & other surfaces.
Removes tea stains or light rust quickly and completely.

Read all directions thoroughly before beginning.

Always use clean equipment.
Do not use with other cleaners.

Dilutions

For heavy soil or rust use as supplied. May be diluted with as much as a 5:1 ratio with water depending on degree of soiling.

Directions:

1. **Apply Rust Remover** with a brush. Allow to dwell. Do not let the rust remover dry on the surface. Re-wet if necessary.
2. **Check after 15-20 minutes** to see if the rust is removed. To check a small area, agitate the rust remover on the surface with a brush or Prep Pad going with the direction of the grain to remove the rust in the grooves of the stainless steel. **Repeat Steps 1 and 2 as necessary** until rust is removed.
3. **Rinse well.** Once the rust is removed, rinse off with fresh water. Use a brush to aid in rinsing as needed. Rinse twice.
4. **Neutralize immediately (See attached directions).** The Rust Remover is acid based; the surface must be neutralized. Follow the attached directions beginning with Neutralize, then Solvent Wipe & Applying Coating.

Product Information Sheet for Rust Remover

Benefits

- Free of oxalic acid - uses new technology
- Very quick and effective
- Thick and foams so it clings - easy to use.
- Stays wet for a long time
- Leaves surfaces clean, streak-free and shiny
- Effective in hard or soft water
- Does not form white deposit with hard water
- Easily applied by brush
